TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, SQL
Frontend/Mobile: React, Vue, Expo/React Native, Flutter, Tailwind CSS
Backend: NestJS, Express.js, Node.js, FastAPI
Databases & Tools: MongoDB, SQL Server, Redis, Git, Docker
Concepts: RESTful APIs, JWT/OAuth, Microservices, Real-time (Socket.IO), Agile

EXPERIENCE

Software Engineer

Oct 2024 – Sep 2026

Net Viet Software Solutions

HCMC, Vietnam

- Reviewed BA specifications and client reports to clarify requirements and deliver approved features on schedule.
- Built internal tooling to sync database records with Google Sheets for reporting and operations teams.
- Shipped features across **Android (Java)**, **Flutter**, **Java/Node.js** backends, and **Vue/React** web applications.
- Contributed full-stack across analysis, implementation, testing, and release throughout the delivery lifecycle.

PROJECTS

TripBlogger | *Expo/React Native, NestJS, SQL Server, Redis, Socket.IO* | [GitHub](#)

Personal Project

- Developed a full-stack travel platform monorepo with **Expo/React Native**, **NestJS**, and **SQL Server**; shared TypeScript itinerary logic via npm workspaces.
- Implemented **JWT** refresh rotation, **Google OAuth**, and a realtime social feed with **Socket.IO**; integrated multi-provider geo APIs with **Redis** caching.
- Delivered marketplace MVP (cart, COD checkout, seller verification) and collaborative trip planner; 32+ unit tests with **Prometheus**, **Grafana**, and **Loki** observability.

pet_store | *FastAPI, Express.js, React, MongoDB, ONNX/YOLO* | [GitHub](#)

Team Project, 2023–2024

- Owned a **FastAPI** microservice using **ONNX/YOLO** for 37-breed pet image classification from user uploads.
- Supported full-stack e-commerce with **Express.js**, **MongoDB**, and **React/Tailwind**; **JWT/Passport** auth with role-based access control.

EDUCATION

Ton Duc Thang University

HCMC, Vietnam

Bachelor — Computer Networks and Data Communications

2021 – 2025
