PROJECTS

- TripBlogger** | *Expo/React Native, NestJS, SQL Server, Redis, Socket.IO* | [GitHub](#) Personal Project
- Built a full-stack travel platform monorepo with **Expo/React Native**, **NestJS**, and **SQL Server**; shared TypeScript itinerary engine across apps via npm workspaces.
 - Implemented **JWT** refresh rotation, **Google OAuth**, role/status guards, and guest-to-member onboarding flow.
 - Delivered realtime social feed with **Socket.IO** and **React Query** cache sync; multi-provider geo routing (OSRM, Overpass, Photon, Nominatim) with **Redis** caching.
 - Shipped marketplace MVP (cart, COD checkout, order lifecycle, seller verification) and collaborative trip planner with drag-reorder stops and map routes; 32+ unit tests with **Prometheus**, **Grafana**, and **Loki**.
- pet_store** | *FastAPI, Express.js, React, MongoDB, ONNX/YOLO* | [GitHub](#) Team Project, 2023–2024
- Owned a **FastAPI** microservice using **ONNX/YOLO** for 37-breed pet image classification from user uploads.
 - Supported full-stack e-commerce with **Express.js**, **MongoDB**, and **React/Tailwind**; **JWT/Passport** auth with RBAC (Customer/Staff/Manager/Admin).

EXPERIENCE

- Software Engineer** Oct 2024 – Sep 2026
Net Viet Software Solutions HCMC, Vietnam
- Clarified requirements from BA specs and delivered approved features across mobile, backend, and web stacks.
 - Built DB-to-Google Sheets sync tooling; shipped on **Android (Java)**, **Flutter**, **Java/Node.js**, and **Vue/React**.
 - Contributed full-stack from analysis through release across the delivery lifecycle.
